EconoSpeed

Slash Fuel Costs

and reduce the burden of driver training

EconoSpeed is a unique acceleration and speed limiting device which improves vehicle efficiency and reduces fuel consumption.

At its most effective in variable driving conditions, EconoSpeed is ideal for bus operations with frequent stop/start journeys and variable passenger loads. It delivers additional benefits by reducing wear and tear to vehicles, helping you achieve greater profitability for your business.

As a fitted device, Econospeed requires no ongoing driver training or interaction; and no time consuming, complex management analysis. It works to save you fuel every time the bus is driven, by any driver.

Zeta Automotive offer trial installations of EconoSpeed on your vehicles, allowing you to experience the benefits for yourself.

EconoSpeed delivers business benefits including:

Reduced fuel consumption

Automatically moderates acceleration for optimum engine performance and fuel economy.

Reduced wear and maintenance

Helps cut wear and tear of vehicle components and consumables.

Improved passenger comfort and safety

Smooth acceleration and travel experience improves customer satisfaction.

Improved driver experience

No special driver training, allows focus on delivering customer service. Reduces driver stress and concerns over performance.

Reduced CO₂ emissions

Cuts the carbon footprint of your operations.

How much will your fleet save?
