EconoSpeed

Cut Fuel Costs

and save on the maintenance of your multi-drop fleet

EconoSpeed is a unique vehicle acceleration and speed limiting device, which improves vehicle efficiency and reduces fuel consumption.

At its most effective in variable driving conditions, EconoSpeed is ideal for multi-drop operations with frequent stop/start journeys and variable loads. It delivers additional benefits by reducing wear & tear to vehicles, helping you drive greater profitability for your business.

As a fitted device, EconoSpeed requires no driver training or interaction.

Zeta Automotive offer trial installations of EconoSpeed on your vehicles, allowing you to experience the benefits for yourself.

EconoSpeed delivers business benefits including:

Reduced Fuel Consumption

Automatically moderates acceleration to optimum engine performance and fuel economy

Reduced vehicle wear and maintenance

Helps cut wear and tear of vehicle components and consumables

Reverse Speed Limiting

Improves vehicle safety, reducing risk of damage to personnel, vehicles and infrastructure

Lower CO² Emissions

Cuts the carbon footprint of your operations

Added Security

Anti hi-jack and added vehicle security

How much will your fleet save?
